Nice

Home Automation

NiceRevolu

Nice revolutionises the world
of automation systems!

Nice can offer a comprehensive automation system that enables management - with a single transmitter and a simple click of a button - of the entire vast range of Nice automations for awnings, shutters, gates, garage doors, and road barriers, as well as enabling control of alarm systems, irrigation and lighting systems.

The Nice systems enhance the real value of your home, guaranteeing more comfort and safety in your day-to-day movements.

tion

New opportunities for integrated home management

Nice presents the very latest new product features: a wide range of technological and intelligent solutions, to achieve integrability of systems and designed to reduce energy consumption.

Simple and fast programming, easy installation and versatile options when upgrading automation systems in the case of restoration work or in new buildings, for perfect light control.

- > **Technology for the installer**
- > **Comfort for the user**
- > **Simplicity for everyone.**

NRC

Nice NRC (Nice Radio Connection) and solar power: freedom travels via radio.

The Nice Radio Connection is a comprehensive system: from remote or wall mounted controls, to weather sensors, to motors.

Nice experience has allowed to develop trustworthy products, with sophisticated and innovative functions that have no equal throughout the world.

New tubular motors, fully automatic with state-of-the-art electronics: automatically flawless movement!

Tubular motor for rolling shutters

> To-Max Pro

Tubular motor ideal for shutters, including smaller versions, with safety stops and anti-intrusion springs.

Electronic limit switches and encoder-controlled movement.
Size M Ø 45 mm.

> For-Max Pro

Tubular motor ideal for shutters, including smaller versions, with safety stops and anti-intrusion springs.

Built-in control unit and receiver.
Electronic limit switches and encoder-controlled movement.
Size M Ø 45 mm.

Plus

Plug-and-Play installation, with automatic, continuous memorisation of limit switch position, with no need for programming; provides absolutely simple installation and servicing, especially in the workshop. Just 3 wires for foolproof connection.

Quiet operation and long working life: thanks to the encoder system, the limit switches are automatically adapted with no forcing on the springs or against the stops, guaranteeing a long shutter lifetime and no clatter.

Exclusive Nice Smart-Memo function: recognises any Nice transmitter as "testing transmitter" during installation, with no need to perform the memorisation procedure; to clear the memory, just disconnect the gearmotor. Allows "hold-to-run" operating modes and use of the automatic limit switch position search, permitting control even during installation.

The benefits for shutters

Maximum precision
Encoder technology guarantees millimetric precision, reliability and maintenance of set values over time.

Perfect movement even in the presence of minor friction
Max motors improve their performance over time, in proportion to the number of manoeuvres performed.

Exclusive intelligent obstacle detection technology
More safety for everyone!
The intelligent motor protects itself, the shutter and any other objects left inadvertently on the windowsill or edge of the window.

New sensor, via radio to control ambient lighting and temperature: the utmost comfort, automatically.

The O-View TT hand-held programmer is designed to make the installer's life easier. Thanks to its simple, intuitive graphic interface, it guides the user step by step through the programming of every single installation parameter. For real professionals!

Control systems

> NiceWay Sensor

As well as offering the best ambient comfort at all times, the NiceWay Sensor is also ideal for increasing the thermal efficiency of the house, reducing the effects of sunlight in hot climates and taking maximum advantage of it in cold climates so as to assure energy savings and environment-friendliness.

Via radio sun, temperature and internal luminosity sensor.

Opens and closes automated solar screens to control the level of ambient lighting.

Comfort + Environmental friendliness = Savings

The 128x49 px **graphic display** with intuitive icon menu and 5 selectable languages makes the NiceWay Sensor extremely simple to program and use by displaying the measured and set values.

Programming

> O-View TT

The O-View TT hand-held programmer represents the state-of-the-art in the programming of rolling shutter and sun awning automation systems.

Automatically recognising the control unit and thus the automation system to which it is connected, it displays its typical parameters, cutting out the device identification procedure for the maximum speed and convenience.

New hand-held programmer with display for For-Max, Neoplus and Neomat motors and Mindy TT0, TT3, TT4 and TT5 control units with TTBUS technology.

Nice

Click...

Nice will take care of it!

Nice is the simplest system to create a coordinated automation system in any type of home, office, hotel and public building.

Choosing Nice means guaranteeing the utmost performance, the latest and most advanced technology and the most practical and innovative design.

NiceLoveEarth

Nice cares for the environment.
Using natural paper it avoids excessive use of raw materials and forest exploitation.
Waste is reduced, energy is saved and climate quality is improved.
