PhoneLink
Telephone Entry System

The American Access Systems, Inc **PhoneLink** telephone entry system is constructed using a heavy gauge, powder coated enclosure and stainless steel faceplate and is designed to be either post or surface mounted.

Functions available with the **PhoneLink** allow the user to conveniently screen entrants from the security of a telephone inside the home or office. When a guest presses the call button, a double ring alerts the people inside that someone is at the gate, rather than an incoming telephone call. Access is allowed by simply pressing * * for a momentary relay operation, or * # to latch the gate open. The gate can be called and latched open without a guest being present at the gate.

This system features a *"one-shot"* code, which enables the user to safely give out a code for one time use only. Additional features include call waiting, call forwarding, full programming capability from the interior telephone, a manual override providing phone switching in the event of damage to the telephone entry unit and an optional pinhole camera for additional security. For the guest with pre-authorized entry, a fully programmable 500 code keypad is provided.

The **PhoneLink** telephone entry is a "No Phone Line" telephone entry system, allowing you to use your existing telephone line without creating an addition to the phone bill.

PhoneLink

16-2050

General Specifications

- Input: 12 VAC or VDC (Transformer included)
- Output: n/o or n/c contact 1 -99 second
- Operating temperature: -15 to 175 Fahrenheit
- Dimensions: 7 3/8" H x 7 3/8" W x 5" D
- 8 ohm Mylar speaker w/ call button
- Ship weight: 9 lbs.
- 3000 ft. range
- Less than 45 mA draw (without nightlight)

Relay Specs

	DC Load	AC Load
Contact Rating	2A @ 30V	.5A @ 125V
Max. switching voltage	125V	125V
Max. carrying current	2A	2A
Max. switching power	60W	62.5VA

Features

- 500 access code capacity
- Programmable Personal Master Code
- Programmable Latch / Sleep Code
- Programmable "One -Shot" Code
- Fully programmable from telephone
- 2 relays
- Adjustable volume:
    - microphone, speaker & phone tone
- Event Input
- Night Light
  - "60 second o n" capability
- Optional camera
- Unique double ring cadence
- Call waiting
- Call forwarding
- Call button disconnect
- By-pass switch included
